

Series 3000 – Business and Non-Instructional Operations

5. Non-instructional Operations

G. Auxiliary Agencies

(1) Transportation

(c) Routes and Services

(iii) Video Cameras on School Transportation

The Board of Education recognizes the district's continuing responsibility to maintain and improve discipline, and ensure the health, welfare and safety of its staff and students on school transportation vehicles and in and outside of school buildings.

The Board of Education, after having carefully weighed and balanced the rights of privacy of students and staff with the district's duty to ensure discipline, health, welfare and safety of staff and students on school transportation vehicles, supports the use of video cameras on its transportation vehicles.

Evidence of student or staff misconduct may be used in disciplinary proceedings and, in appropriate cases, shared with law enforcement officials where there is evidence of criminal activity. The district shall comply with all applicable state and federal laws related to video recordings when, as determined by the district and in accordance with law, such recordings are considered for retention as part of a student's behavioral record or a staff member's personnel record. Such records will also be subject to established district student and personnel records procedures including retention, access, review and release of such records.

The school administration will ensure that students, parents, and staff are notified annually of this policy and the existence of video surveillance on school buses via student/parent handbooks.

The Superintendent shall develop such procedures as may be required for the implementation of this policy.
