

Series 5000 – Students**1. Elementary and Secondary****D. Welfare****(1) School Medical Advisor****(b) Illness****(iv) Communicable and Infectious Diseases**

The Suffield Board of Education recognizes that all children have a constitutional right to a free, suitable program of educational experiences. The Board of Education has established reasonable health requirements as prerequisites to admission or attendance, including the requirement that students undergo physical examination prior to admission.

Where it can be medically established that a student suffers from a serious infectious disease and there is a significant risk of transmission of the disease to others because of the nature of the disease or the personal characteristics of the student carrier, it may be appropriate to exclude the student from the regular classroom. The determination of exclusion of any student will be made on a case by case basis with appropriate procedural due process safeguards. However, where the risk of transmission is relatively low or appropriate procedures can be adopted to reduce the risk of transmission, exclusion is not warranted.

A child with an infectious disease may be considered handicapped, if the condition presents such physical impairment that limits one or more major life activities. Therefore, Section 504 of the Rehabilitation Act, the “Education of All Handicapped Children Act” may apply. The parent, guardian or the school administration may make a referral for determination whether the student is handicapped and entitled to protection under Section 504. The Planning and Placement Team will determine whether the student is handicapped or is “otherwise qualified” within the meaning of Section 504. All students should be educated in the least restrictive environment.

The District will include, as part of its emergency procedure plan, a description of the actions to be taken by District personnel in case of pandemic flu outbreak or other catastrophe that disrupts District operations.
